**Windows XP and Vista Users - How to Delete Browsing History from Java**

1. Click on **Start**, then **Control Panel**
2. In the Control Panel (classic view), click on the **Java Icon** to open the Java Control Panel.
3. In the **Java Control Panel**, in the section “**Temporary Internet Files**”, click **Settings**.
4. In the **Temporary Files Settings**, click **Delete Files**.
5. Verify that BOTH Applications and Applets and Trace and Log Files are checked, then click OK.
6. Click OK to close each window, then close the Windows Control Panel.

**Macintosh Users – How to Delete Java Browsing History**

1. Navigate to the Java folder from your hard drive: **HD > Applications > Utilities > Java**.
2. Open the **Java Preferences** application.
3. Click on the **General** tab.
4. Click the **Delete Files** button (under the Temporary Internet Files section).

**Internet Explorer 7 Users – Delete Browsing History**

1. Open an **Internet Explorer** window.
2. Click on **Tools**, then **Browsing History**.
3. **Delete** the **Temporary Internet Files** and the **Cookies**.
4. Close all IE windows and re-open a new browser window before logging on to Blackboard.

**Mozilla Firefox Users – Delete Browsing History**

1. Open a **Mozilla** browser window.
2. Click on **Tools**, then **Clear Private Data**.
3. Delete the **Browsing History, Cache, Cookies and Authenticated Sessions**.
4. Close all Mozilla windows and re-open a new browser window before logging on to Blackboard.

**Safari Users – Delete Browsing History**

1. Open up **Safari**.
2. Go to the **History** menu.
3. Choose '**Clear History**' at the bottom of the pull down menu.
